

Oral Newell retires after 39 years

Bently Nevada Corporation would like to acknowledge the retirement of a friend and esteemed colleague, Oral Newell, Public Service Company of Oklahoma (PSO). Mr. Newell was one of the innovators in applying monitoring and diagnostic techniques to turbine generator sets. He was also one of the first people to see a need for Bently Nevada's Digital Vector Filter and one of the first to do remote diagnostics, following our philosophy of moving data not people.

He has been a staunch supporter of Bently Nevada Corporation during his 39 year career at PSO; we wish him a long and well-deserved retirement. ■
